Prep Review

Boarding Schools Prep Review LLC

The book offers a comprehensive look at college preparatory boarding schools in the United States, Canada, and the United Kingdom through the eyes of recent graduates who are now attending prestigious colleges and universities such as Harvard, MIT, Princeton, Yale, Oxford, and Cambridge. The approach is distinctive, giving readers the opportunity to get the real “inside story” from their peers and learn more about what the schools are like than the youngsters and their parents could learn in a campus visit or standard guidebook. The book does a great job presenting a wealth of information in a diverse array of voices. Student readers will no doubt feel that the reviewers quoted in the book shared many of their questions and concerns as students, and parents are likely to appreciate the frankness of the reviewers' comments as well. Excerpts from the book: "My college counselor also had good relationships with college admissions officers and was able to update me on how they'd reacted to my applications. In the end, I applied to Harvard, MIT, Stanford, Harvey Mudd, and Caltech (California Institute of Technology), and I got into all of them, so I was happy with my college counselor's efforts (and the efforts of the CCO as a whole) in promoting my application, as well as in helping me decide where I wanted to go." - MIT student "Students at Groton tend to be either very smart, very rich, or both (because some people just seem to have it all). Many kids have attended private schools their whole lives. The school favors well-rounded individuals. Athletic recruits also have to be intelligent. In my time at Groton, the kids who were not motivated enough to get through the school's rigors ended up leaving. The admissions process requires an interview, during which I recommend candidates dress conservatively while showing themselves to be original thinkers." - Harvard student “The British exam system is, for the most part, based on assessment objectives: tick the boxes and you're guaranteed a great result. At Eton, while you are taught to tick the boxes, this is merely a preliminary measure: the emphasis in on going beyond the exam and enjoying the subject in all its depth” - Oxford student "Gaining admission to St. Albans can prove quite difficult, because it is arguably the most selective school in the Washington, D.C., area. However, distinguishing oneself above other applicants is no mystery. Performing well on the SSATs and the ISEEs certainly helps the admissions

officers look at an applicant more favorably. However, the dynamic applicant that St. Albans seeks extends far beyond standardized tests." - University of Pennsylvania student Boarding schools in the United States:Cate SchoolChoate Rosemary HallCranbrook SchoolsDeerfield AcademyGroton SchoolHotchkiss SchoolKent SchoolLawrenceville SchoolLoomis Chaffee SchoolMercersburg AcademyMiddlesex SchoolMilton SchoolNobles and Greenough SchoolNorthfield Mount Hermon SchoolPeddie SchoolPhillips Exeter AcademyPhillips Academy AndoverSt. Albans SchoolSt. George's SchoolSt. Paul's SchoolTabor AcademyThacher SchoolWebb Schools Boarding schools in the United Kingdom:Benenden SchoolCheltenham Ladies' CollegeDowne House SchoolEton CollegeFettes CollegeKing's School, CanterburyOundle SchoolRadley CollegeRugby SchoolSevenoaks SchoolShrewsbury SchoolSt. Paul's School, LondonSt. Swithun's SchoolTonbridge SchoolWestminster School, LondonWinchester College Boarding schools in Canada:Bishop Strachan SchoolSt. Michaels University SchoolSt. George's School, Vancouver Get instant online access to hundreds of reviews and rankings by MIT Ivy League and Oxbridge educated insiders: <http://www.PrepReview.com> and [facebook.com/PrepReview](https://www.facebook.com/PrepReview) to win a free book

Frank Ramsey

A Sheer Excess of Powers Oxford University Press

When he died in 1930 aged 26, Frank Ramsey had already invented one branch of mathematics and two branches of economics, laying the foundations for decision theory and game theory. Keynes deferred to him; he was the only philosopher whom Wittgenstein treated as an equal. Had he lived he might have been recognized as the most brilliant thinker of the century. This amiable shambling bear of a man was an ardent socialist, a believer in free love, and an intimate of the Bloomsbury set. For the first time Cheryl Misak tells the full story of his extraordinary life.

Math Without Numbers Penguin

An illustrated tour of the structures and patterns we call "math" The only numbers in this book are the page numbers. Math Without Numbers is a vivid, conversational, and wholly original guide to the three main branches of abstract math—topology, analysis, and algebra—which turn out to be surprisingly easy to grasp. This book upends the conventional approach to math, inviting you to think creatively about shape and dimension, the infinite and infinitesimal, symmetries, proofs, and how these concepts all fit together. What awaits readers is a freewheeling tour of the inimitable joys and unsolved mysteries of this curiously powerful subject. Like the classic math allegory Flatland, first published over a century ago, or Douglas Hofstadter's Godel, Escher, Bach forty years ago, there has never been a math book quite like Math Without Numbers. So many popularizations of math have dwelt on numbers like pi or zero or infinity. This book goes well beyond to questions such as: How many shapes are there? Is anything bigger than infinity? And is math even true? Milo Beckman shows why math is mostly just pattern recognition and how it keeps on surprising us with unexpected, useful connections to the real world. The ambitions of this book take a special kind of author. An inventive, original thinker pursuing his calling with jubilant passion. A prodigy. Milo Beckman completed the graduate-level course sequence in mathematics at age sixteen, when he was a sophomore at Harvard; while writing this book, he was studying the philosophical foundations of physics at Columbia under Brian Greene, among others.
