Integral Table

The following is a list of integrals (antiderivative functions) of rational functions.Any rational function can be integrated by partial fraction decomposition of the function into a sum of functions of the form: $\frac{1}{(x+a)^n}$, and $\frac{1}{(x+a)^n} + \frac{1}{(x+a)^{n+1}}$.which can then be integrated term by term. For other types of functions, see lists of integrals

A lot of the integrals in this section can easily be done using a Table of Integrals. (Of course, use a computer to do integrals whenever you can!) Points to note: It's very important to understand the substitutions $u = \sin x$ and $u = \cos x$ (which is the case for most integrations) Make sure you use the correct formula!! Some are very similar to others.
