The two main protocols defined in this architecture are: • IP (Internet Protocol) network level, which provides connectionless service. • TCP (Transmission Control Protocol) transport level, which provides a service with reliable connection. TCP / IP define a layered architecture that also includes, without being explicitly defined, an access interface to the network.

TCP/IP Architecture - Computer Notes

This architecture has gone by many names over the years. One of the first names was Hexagonal Architecture, followed by Ports-and-Adapters. More recently, it's been cited as the Onion Architecture or Clean Architecture. The latter name, Clean Architecture, is used as the name for this architecture in this e-book.
