Comparative Research Methods

In section 2.3 we shall
enter into the
important topic of the
comparative approach,

i.e. the comparative
method and its
implications for a
'proper' research
design. The central
argument will be that a
coherent framework of
theoretical references
and a corresponding
logic of inquiry are
required.

The Comparative approach: theory and method

Comparative research
can inform projects at
early stages, providing
fodder and direction for
initial design concepts,
and in the midst of
design iterations when
refining content,
interaction, and
general architectural
patterns. Some things
to consider:
Comparative analyses
can save time.

The Advantage of Comparative

Research | Viget

In descriptive-comparative research, the researcher considers 2 variables which are not manipulated, and establish a formal procedure to conclude that one is better than the other. For example, an examination body wants to determine the better method of conducting tests between paper-based and computer-based tests.

Descriptive Research Designs: Types, Examples & Methods

Comparative research is a research methodology in the social sciences that aims to make comparisons across different countries or cultures. A major problem in

comparative research is that the data sets in different countries may define categories differently (for example by using different definitions of poverty) or may not use the same categories.

Comparative research - Wikipedia

A causal-comparative design is a research design that seeks to find relationships between independent and dependent variables after an action or event has already occurred. The researcher's goal is to determine whether the independent variable affected the outcome, or dependent variable, by comparing two or more groups of individuals.

Causal-Comparative Design - SAGE

Research Methods

Correlational research design: Correlational research is a non-experimental research design technique that helps researchers establish a relationship between two closely connected variables. This type of research requires two different groups.

Research Design: Definition, Characteristics and Types ...

Comparative research is a method of analyzing and comparing different populations and how they differ from each other. As an observational method, a comparative analysis examines the variables in a given period to gain substantial results. This has uses in many fields, such as

medicine, business, and social sciences.

What is COMPARATIVE RESEARCH? What does COMPARATIVE ...

Holtz-Bacha and Kaid note that in comparative communication research the “study designs and methods are often compromised by the inability to develop consistent

methodologies and data-gathering techniques across countries" (pp. 397-398). Consequently, they call for "harmonization of the research object and the research method" across studies to guarantee the best possible comparability and generalizability.

Comparative Research Methods - Esser - - Major Reference ...

We will examine in detail the practicalities of different types of comparative research designs, by following all the hands-on steps: prior arbitrations and 'casing', i.e. the definition of the cases case selection, through more basic or more advanced strategies collecting and managing comparative

data

Comparative Research Designs

Many treatments are adopted into clinical practice without a solid evidence base and might be used heterogeneously across settings. Rigorous randomised controlled trials are therefore needed to inform decisions about the comparative effectiveness of treatments in common use. The mainstay of comparative effectiveness research is pragmatic trial design, which emphasises broad eligibility ...

Use of multiple period, cluster randomised, crossover ...

COMPARATIVE RESEARCH 1 According

to Pickvance (2005), comparative analysis is conducted mainly to explain and gain a better understanding of the causal processes involved in the creation

of an event, feature or relationship usually by bringing together variations in the explanatory variable or variables.
