Active transport requires energy. (Transport proteins act like pumps Use-energy to move small molecules and ions across cell membranes. The bulk

transport of large molecules and clumps of materials into and out of cells occurs by movements of the cell membrane, which require energy.

ISD 2135 Maple River Schools / Homepage

Passive transport occurs when substances cross the plasma membrane without any input of energy from the cell. No energy is needed because the substances are moving from an area where they have a higher concentration to an area where they have a lower concentration. Water solutions are very important in biology.
