Directing the Camera

How Professional Directors Use a Moving Camera to Energize Their Films

On motion picture and television sets today the director spends 90% of his time directing the camera. Professional actors come to set prepared to direct themselves. In spite of this recent change, 90% of all books on directing do not teach specifically how to direct the camera. Gil

Bettman's new book, *Directing the Camera*, fills that void by teaching the elements of craft that contemporary directors use to give their films the visually dynamic look preferred by audiences today. The first half of this book is devoted to teaching a systemised approach that can be used to design the very best moving shot for any dialogue scene, no matter how complex or long. Bettman's "Five Task" approach enables the aspiring director to quickly grasp this difficult element of directorial craft. In the second half the reader is taught how to shoot action sequences using moving and static cameras and the gamut of lenses to achieve the magic trick essential to shooting action -- making stunts that are highly controlled and neither violent nor dangerous look completely mind-blowing.

**No Country for Old Men** *Vintage*

This blistering novel—from the bestselling, Pulitzer Prize-winning author of *The Road*—returns to the Texas-Mexico border, setting of the famed *Border Trilogy*. The time is our own, when rustlers have given way to drug-runners and small towns have become free-fire zones. One day, a good old boy named Llewellyn Moss finds a pickup truck surrounded by a bodyguard of dead men. A load of heroin and two million dollars in cash are still in the back. When Moss takes the money, he sets off a chain reaction of catastrophic violence that not even the law—in the person of aging, disillusioned Sheriff Bell—can contain. As Moss tries to evade his pursuers—in particular a mysterious mastermind who flips coins for human lives—McCarthy simultaneously strips down the American crime novel and broadens its concerns to encompass themes as ancient as the Bible and as bloodily contemporary as this morning’s headlines. *No Country for Old Men* is a triumph.

**Lighting for Cinematography**

**A Practical Guide to the Art and Craft of Lighting for the Moving Image** *Bloomsbury Publishing USA*

We can't shoot good pictures without good lighting, no matter how good the newest cameras are. Shooting under available light gives exposure, but lacks depth, contrast, contour, atmosphere and often separation. The story could be the greatest in the world, but if the lighting is poor viewers will assume it's amateurish and not take it seriously. Feature films and TV shows, commercials and industrial videos, reality TV and documentaries, even event and wedding videos tell stories. Good lighting can make them look real, while real lighting often makes them look fake. *Lighting for Cinematography*, the first volume in the new CineTech Guides to the Film Crafts series, is the indispensable guide for film and video lighting. Written by veteran gaffer and cinematographer David Landau, the book helps the reader create lighting that supports the emotional moment of the scene, contributes to the atmosphere of the story and augments an artistic style. Structured to mimic a 14 week semester, the chapters cover such things as lighting for movement, working with windows, night lighting, lighting the three plains of action and non-fiction lighting. Every chapter includes stills, lighting diagrams and key advice from professionals in the field, as well as lighting exercises to help the reader put into practice what was covered. **On Film-Making**

A priceless examination of the filmmaker's craft, from the renowned director of "Sweet Smell of Success" After more than twenty years in the film industry as a screenwriter, storyboard editor, and director of memorable films such as "The Ladykillers," Alexander Mackendrick turned his back on Hollywood and began a new career as the Dean of one of the country's most demanding and influential film schools. At the core of Mackendrick's lessons lay a deceptively simple goal: to teach aspiring filmmakers how to structure and write the stories they want to tell, while using the devices particular to the medium of film to tell their stories effectively. In this impressive volume, edited by Paul Cronin, the myriad materials that made Mackendrick's reputation as an instructor are collected for the first time, offering a chance for professionals as well as students to discover a methodology of filmmaking that is challenging yet refreshing in its clarity. **Down and Dirty Pictures**

**Miramax, Sundance, and the Rise of Independent Fil** *Simon and Schuster*

In this “dishy...superbly reported” (Entertainment Weekly) New York Times bestseller, Peter Biskind chronicles the rise of independent filmmakers who reinvented Hollywood—most notably Sundance founder Robert Redford and Harvey Weinstein, who with his brother, Bob, made Miramax Films an indie powerhouse. As he did in his acclaimed *Easy Riders, Raging Bulls*, Peter Biskind “takes on the movie industry of the 1990s and again gets the story” (The New York Times). Biskind charts in fascinating detail the meteoric rise of the controversial Harvey Weinstein, often described as the last mogul, who created an Oscar factory that became the envy of the studios, while leaving a trail of carnage in his wake. He follows Sundance as it grew from a regional film festival to the premier showcase of independent film, succeeding almost despite the mercurial Redford, whose visionary plans were nearly thwarted by his own quixotic personality. Likewise, the directors who emerged from the independent movement, such as Quentin Tarantino, Steven Soderbergh, and David O. Russell, are now among the best-known directors in Hollywood. Not to mention the actors who emerged with them, like Matt Damon, Ben Affleck, Ethan Hawke, and Uma Thurman. Candid, controversial, and “sensationally entertaining” (Los Angeles Times) *Down and Dirty Pictures* is a must-read for anyone interested in the film world.

Surviving Production

The Art of Production Management for Film and Television

\$30 Film School Course Technology Ptr

Filmmaking is entering a new era. Mini-DV filmmaking is the new folk music, the new punk rock, the new medium in which anyone can tell their story. "\$30 Dollar Film School, Second Edition" is an alternative to spending four years and a hundred-thousand dollars to learn the filmmaking trade. It is influenced by punk rock's "Do-it-Yourself" spirit of just learning the basics and then jumping up on a stage and making a point; and by the essence of the American work ethic. This new edition of the bestselling title includes new, improved, and updated chapters on video and audio editing, plus a companion DVD-Rom loaded with movies, shorts, and trailers from "graduates" of the first edition.

**Writing, Directing, and Producing Documentary Films and Videos, Fourth Edition** *SIU Press*  
As Alan Rosenthal states in the preface to this new edition of his acclaimed resource for filmmakers, Writing, Directing, and Producing Documentary Films and Videos is “a book about storytelling—how to tell great and moving stories about fascinating people, whether they be villains or heroes.” In response to technological advances and the growth of the documentary hybrid in the past five years, Rosenthal reconsiders how one approaches documentary filmmaking in the twenty-first century. Simply and clearly, he explains how to tackle day-to-day problems, from initial concept through distribution. He demonstrates his ideas throughout the book with examples from key filmmakers’ work. New aspects of this fourth edition include a vital new chapter titled "Making Your First Film," and a considerable enlargement of the section for producers, "Staying Alive," which includes an extensive discussion of financing, marketing, festivals, and distribution. This new edition offers a revised chapter on nonlinear editing, more examples of precise and exacting proposals, and the addition of a complex budget example with explanation of the budgeting process. Discussion of documentary hybrids, with suggestions for mastering changes and challenges, has also been expanded, while the “Family Films” chapter includes updated information that addresses rapid expansion in this genre.
