Thermal Generation | Newfoundland & Labrador Hydro

A thermal power station is a power station in which heat energy is converted to electric power. In most, a steam-driven turbine converts heat to mechanical power as an intermediate to electrical power. Water is heated, turns into steam and drives a steam turbine which drives an electrical generator. After it passes through the turbine the steam is condensed in a condenser and recycled to where ...

Thermal power station - Wikipedia

Situated 45km south of eMalahleni (formerly Witbank), Kriel Colliery was established in 1975 to supply coal to Eskom's Kriel Power Station. Kriel's underground operation is mined by means of the mechanised board- and-pillar method, while its opencast operation mining takes place using dragline as well as truck and shovel methods.
