In this paper we briefly
review the history of
high-throughput
research and then
focus on some recent
applications of this
paradigm in
superconductivity
research. We consider
the role these methods
can play in all stages of

materials
development, including
high-throughput
computation,
synthesis,
characterization, and
the emerging field of
machine learning for
materials.

New Developments In Superconductivity Research [EPUB]

Prof Ranga Dias and team make world's first-ever room-temperature superconductor By Sajitha Prematunge It is not a vaccine for COVID-19, but it could be the next best thing. The world's first superconductor at room temperature, developed by a research team lead by Sri Lankan born physicist, Prof. Ranga Dias at the University of Rochester, USA, [...]
