This Student Guide, designed by HS teacher Jonathan Carlson for the calculus-based or AP physics course, takes students step-by-step through the calculations associated with the photoelectric effect. Students will use the PhET Photoelectric Effect simulation to calculate stopping voltage, kinetic energy of a photon in Joules, and learn how to determine threshold frequency

and work function from graphical data. This resource contains an answer key.

• Electrons are emitted with a range of energies because photons can eject

electrons with a range of binding energies. If more of a photon's energy is used to release an electron, the emitted electron will have less kinetic energy.
