Multiple choice exams have more to do with eliminating the wrong answers than finding the right answers. This may not instantly make sense but consider this: There are 3 wrong answers and 1 right answer. It's often easier to recognize 3 wrong answers than recognizing the single right answer. There are unlimited ways an answer can be wrong.

Multiple choice or objective response is a form of an objective assessment in which respondents are asked to select only correct

answers from the choices offered as a list. The multiple choice format is most frequently used in educational testing, in market research, and in elections, when a person chooses between multiple candidates, parties, or policies. Although E. L. Thorndike developed an early scientific approach to testing students, it was his assistant Benjamin D. Wood who developed the
