The Agile PLM 9.3.3 Software Requirements table shows the operating system and other software supported or required for each Agile component. The application server includes all server components for AIS, SDK, Reports, Import, Export, Agile Content Service, LDAP, and all solutions. The table below lists the supported application servers.

Agile PLM 9.3.3 Supported Environments - Oracle

Agile 9.3.1.2 is only certified to run on an Oracle 10g or 11g database server. But you can certainly import the database onto an 12c database server and update the Agile configuration to point to it instead of your usual server, and I would expect that it would most likely work just fine.

Agile 9.3.6 Release Update Pack (RUP) 9 was released in April 2019 and includes a feature that may not have gotten much attention, but it should. RUP 9 introduced support for SAML 2.0 Authentication. SAML is an abbreviation for Security Assertion Markup Language and without getting too technical, it's an XML-based framework for passing authentication

credentials.
