Analysis of Integrated and Cointegrated Time Series with R

Cointegration is a statistical property of a collection $(X_1, X_2, \dots, X_k)$ of time series variables. First, all of the series must be integrated of order d (see Order of integration). Next, if a linear combination of this collection is integrated of order less than d , then the collection is said to be co-integrated. Formally, if (X, Y, Z) are each integrated of order d , and there exist coefficients a, b, c such that $aX + bY + cZ$ is integrated of order less than d , then X, Y , and Z are cointegrated. Co
