Counselling for Toads *Routledge*

'Toad', the famous character in Kenneth Grahame's The Wind in the Willows is in a very depressed state and his good friends Rat, Mole and Badger, are 'worried that he might do something silly'... First they nursed him. Then they encouraged him. Then they told him to pull himself together... Finally, Badger could stand it no longer. That admirable animal, though long on exhortation, was short on patience. 'Now look here Toad, this can go

on no longer', he said sternly. 'There is only one thing left. You must have counselling!' Robert de Board's engaging account of Toad's experience of counselling will capture the imagination of the growing readership of people who are interested in counselling and the counselling process. Written as a real continuation of life on the River Bank, Toad and his friends come to life all over again. Heron, the counsellor, uses the language and ideas of transactional analysis as his counselling method. Through the dialogues which make up the ten sessions, or chapters of the book, Toad learns how to analyse his own feelings and develop his emotional intelligence. He meets his 'rebellious child' and his 'adult' along the way, and by the end of the book, as debonair as ever he was, is setting out on a completely new adventure. As readers learn about Toad, so they can learn about themselves and be encouraged to take the path of psychological growth and development. Best-selling author, Robert de Board says: 'Toad's experiences are based on my own experiences of counselling people over a period of twenty years. Counselling for Toads is really an amalgamation of the many counselling sessions I have held and contains a distillation of the truths I have learnt from practice.' Appropriate for anyone approaching counselling for the first time, whether as a student or as a client, or for the professional counsellor looking for something to recommend to the hesitant, Counselling for Toads will appeal to both children and adults of all ages.

The Psychoanalysis of Organizations *Routledge*

One of the most pressing needs of modern society is to understand and construct organizations that are not only effective in terms of carrying out work but that also allow and encourage people to develop their full human potential. Psychoanalytic theory describes those primary processes that lie at the heart of human activity and provides new insights for understanding group and organizational behaviour. With a new introduction written by Vega Roberts, this Classic Edition of The Psychoanalysis of Organizations presents the theories of Sigmund Freud, Melanie Klein, Wilfred Bion, Elizabeth Lewin and Eric Menzies in plain language and shows their relevance to normal working life. First published in 1978, Robert De Board takes a wide-ranging overview of the major psychoanalytic theorists and organizational researchers, and analyses how the two groups can work together. Written in a very accessible style, it makes sophisticated psychoanalytic and management concepts comprehensible and usable for anyone.

Resource Focused Counselling and Psychotherapy *Routledge*

Therapists sometimes ask: What supports you in life? What gets you through difficult times? Our ‘journey’ in life relies on a range of resources to equip and fulfil us. Knowing about these resources, however, is not enough: for lasting benefits, they must be bodily felt experiences. The aim of this book is to illustrate the holistic purpose of therapy to resource integration of the client. It draws upon extensive material to affirm that the practice of contemporary therapy benefits from insights gained from evolving neuroscience. Particular emphasis is put on the benefits of drawing on the dimensions of experience to strengthen ego processes like self-awareness and self-regulation, and engage with the depths of being, including ‘soul’. Resource Focused Counselling and Psychotherapy provides professionals with a comprehensive and integrative model of resource focused therapy, drawing upon clinical examples and the current range of research and theory surrounding this emerging approach. Additionally, the book contains a range of self-resourcing exercises and practices for each part of the integrative model, enabling individuals to develop self-resources for greater resilience and well-being in their own lives. This book is an important read for psychotherapists, psychologists and counsellors, including those working with trauma. It also provides valuable insights for modalities practising from a psycho-spiritual perspective, including Jungian and transpersonal psychotherapists.

The Shadow and the Counsellor *Routledge*

The Shadow and the Counsellor introduces the concept of shadow, the darker side to ourselves that we do not wish to acknowledge, or do not even recognise. It examines how it comes into being and explores its impact within counselling. The Shadow and the Counsellor is structured around a six stage model which is designed to help the counsellor recognise, confront and deal with their 'shadow' side. This can then be a framework for reflection and practical action. With case studies including short clinical examples to longer examples running through the book, this will give counsellors a new way of approaching their practice.

Effective Psychotherapists *Guilford Publications*

What is it that makes some therapists so much more effective than others, even when they are delivering the same evidence-based treatment? This instructive book identifies specific interpersonal skills and attitudes--often overlooked in clinical training--that facilitate better client outcomes across a broad range of treatment methods and contexts. Reviewing 70 years of psychotherapy research, the preeminent authors show that empathy, acceptance, warmth, focus, and other characteristics of effective therapists are both measurable and teachable. Richly illustrated with annotated sample dialogues, the book gives practitioners and students a blueprint for learning, practicing, and self-monitoring these crucial clinical skills.

Relational Integrative Psychotherapy *John Wiley & Sons*

Designed specifically for the needs of trainees and newly-qualified therapists, Relational Integrative Psychotherapy outlines a form of therapy that prioritizes the client and allows for diverse techniques to be integrated within a strong therapeutic relationship. Provides an evidence-based introduction to the processes and theory of relational integrative psychotherapy in practice Presents innovative ideas that draw from a variety of traditions, including cognitive, existential-phenomenological, gestalt, psychoanalytic, systems theory, and transactional analysis Includes case studies, footnotes, ‘theory into practice’ boxes, and discussion of competing and complementary theoretical frameworks Written by an internationally acclaimed speaker and author who is also an active practitioner of relational integrative psychotherapy

Amphibians: A Very Short Introduction *Oxford University Press*

Very Short Introductions: Brilliant, Sharp, Inspiring From frogs, toads, newts, and salamanders, to the lesser-known caecilians, there are over 8,000 species of amphibians alive today. Characterised by their moist, naked skin and the tadpole phase of their lives, they are uniquely adapted to occupy the interphase habitat between freshwater and land. This Very Short Introduction explores amphibians' evolution, adaptations, and biology, from the first emergence of tetrapods onto land 370 million years ago, to how their permeable skin enables them to thrive in their habitat today. T. S. Kemp describes how different amphibians go about their lives, looking in particular at their complex courtship behaviour and their extraordinary means of providing care for their eggs and larvae. Finally, he considers amphibians' relationship to humans, and the ways in which they have been exploited as food, folk medicine, and pets, as well as used in many areas of scientific research. Today amphibians face a serious threat, with almost half of species judged to be at risk of extinction. As the causes include habitat destruction, pollution, and disease, mostly resulting from human activity, T. S. Kemp shows that the conservation of amphibians is very much in our hands. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Everyday Mysteries *Routledge*

This book provides an in-depth introduction to existential psychotherapy. Presenting a philosophical alternative to other forms of psychological treatment, it emphasises the problems of living and the human dilemmas that are often neglected by practitioners who focus on personal psychopathology. Emmy van Deurzen defines the philosophical ideas that underpin existential psychotherapy, summarising the contributions made by Kierkegaard, Nietzsche, Heidegger and Sartre among others. She proposes a systemic and practical method of existential psychotherapy, illustrated with detailed case material. This expanded and updated second edition includes new chapters on the contributions of Max Scheler, Albert Camus, Gabriel Marcel and Emmanuel Levinas, as well as on feminist contributors such as Simone de Beauvoir and Hannah Arendt. In addition a new extended case discussion illustrates the approach in practice. Everyday Mysteries offers a fresh perspective for anyone training in psychotherapy, counselling, psychology or psychiatry. Those already established in practice will find this a stimulating source of ideas about everyday life and the mysteries of human experience, which will throw new light on old issues.

Relationship : Bridge to the Soul *Nelson, B.C. : Star Watch Pub.*

Personal Development Groups for Trainee Counsellors *Routledge*

Personal development (PD) groups are a key feature of many counsellor training programmes. Personal Development Groups for Trainee Counsellors: An Essential Companion is a comprehensive and accessible study guide written by experienced tutors and lecturers to support students with their PD group work and other personal development activities, helping students to get the most out of these experiences. This essential resource is aimed primarily at those who are new to counsellor training. It will also be useful for anyone who wants to understand more about the nature of PD groups and how these can be used effectively. Case studies, questions and activities encourage readers to reflect on different topics and on themselves, including looking at how to improve self-care and how mindfulness can help. The book looks at the historical background to PD groups; how they can be used effectively, and also real-life experiences from both tutors and recent students. Other chapters invite the reader to develop their self-awareness through gaining an understanding of how ethics, relationships and identity are developed. There is a discussion about the merits or otherwise of mandatory personal therapy for trainees and also a discussion about the use of supervision. Finally, other important aspects of personal development are discussed including personal therapy, supervision, self-care and mindfulness. Personal Development Groups for Trainee Counsellors will be of use to counsellor trainees on undergraduate and postgraduate diplomas to introduce them to PD groups and other essential activities. It will also be highly informative to those who are on counselling certificate courses to introduce them to aspects of personal development, as well as for tutors to support them in their work as PD group facilitators.

Blank Minds and Sticky Moments in Counselling SAGE

'I recommend the book as an essential, core, alternative or complementary text for trainees in counselling, hitting as it does, just the right notes of honesty, realism, humour and theory-made-digestible. It deserves to be on the reading lists of all certificate and diploma courses - now' - Colin Feltham, Sheffield Hallam University Blank Minds and Sticky Moments in Counselling, Second Edition is a popular and down-to-earth guide to the common challenges which arise in everyday counselling practice. Drawing on humour and over 30 years experience, the authors describe a range of strategies to help practitioners and trainees through the 'sticky' moments and offer reassurance that 'you are not alone' in facing these dilemmas. The book explores what to do when you: " feel stuck and are failing to help the client move forward " are faced with a client who struggles with verbal communication " encounter a client with mental-health problems " find interpersonal issues are affecting your view of a client " find yourself at odds with the values of your client The authors also tackle broader issues concerning what it means to be professional, tensions between theory and practice and offer a four-stage model of counselling as a framework for practice. The underlying goal of the book is to help readers see difficult moments as learning experiences and to feel empowered to be imaginative, creative and flexible practitioners. Blank Minds and Sticky Moments in Counselling, Second Edition is a rich source of practical advice for trainees and practitioners. Graham Dexter and Janice Russell are freelance trainers and consultants in counselling.

The Willows and Beyond Macmillan

The Principles of Psychology

Married to a Bedouin Virago

""Where you staying?" the Bedouin asked. "Why you not stay with me tonight - in my cave?" Thus begins Marguerite van Geldermalsen's story of how a New Zealand-born nurse came to be married to Mohammad Abdallah Othman, a Bedouin souvenir-seller from the ancient city of Petra in Jordan. It was 1978 and she and a friend were travelling through the Middle East when Marguerite met the charismatic Mohammad who convinced her that he was the man for her. A life with Mohammad meant moving into his ancient cave and learning to love the regular tasks of baking shrak bread on an open fire and collecting water from the spring. And as Marguerite feels herself becoming part of the Bedouin community, she is thankful for the twist in fate that has led her to this contented life. Marguerite's light-hearted and guileless observations of the people she comes to love are as heart-warming as they are valuable, charting Bedouin traditions now lost to the modern world.

Stuff That Sucks New Harbinger Publications

Sometimes everything sucks. This unique, illustrated guide will help you move past negative thoughts and feelings and discover what truly matters to you. If you struggle with negative thoughts and emotions, you should know that your pain is real. No one should try to diminish it. Sometimes stuff really does suck and we have to acknowledge it. Worry, sadness, loneliness, anger, and shame are big and important, but they can also get in the way of what really matters. What if, instead of fighting your pain, you realized what really matters to you—and put those things first in life? If you did that, maybe your pain wouldn't feel so big anymore. Isn't it worth a try? Stuff That Sucks offers a compassionate and validating guide to accepting emotions, rather than struggling against them. With this book as your guide, you'll learn to prioritize your thoughts, feelings, and values. You'll figure out what you care about the most, and then start caring some more! The skills you'll learn are based on acceptance and commitment therapy (ACT). Yes, there are a few written exercises, but this isn't a workbook. It's a journey into the stuff that sucks, what makes that sucky stuff suck even more, and how just a few moments each day with the stuff that matters will ultimately transform the stuff that sucks into stuff that is just stuff. Make sense? Maybe you want to be more creative? Or maybe you simply want to do better in school or be a better friend? This book will show you how to focus on what you really care about, so that all that other sucky stuff doesn't seem so, well, sucky anymore.

Work Like a Spy Penguin

“The book you are holding will fundamentally change the way you look at the collection, compartmentalization, analysis, distribution, application, and protection of intelligence in your business. J. C. Carleson’s presentation of years of spy tradecraft will make you a more effective force within your organization.” —James Childers, CEO, ASG Global, Inc. When J. C. Carleson left the corporate world to join the CIA, she expected an adventure, and she found it. Her assignments included work in Iraq as part of a weapons of mass destruction search team, travels throughout Afghanistan, and clandestine encounters with foreign agents around the globe. What she didn’t expect was that the skills she acquired from the CIA would be directly applicable to the private sector. It turns out that corporate America can learn a lot from spies—not only how to respond to crises but also how to achieve operational excellence. Carleson found that the CIA gave her an increased understanding of human nature, new techniques for eliciting information, and improved awareness of potential security problems, adding up to a powerful edge in business. Using real examples from her experiences, Carle-son explains how working like a spy can teach you the principles of: Targeting—figuring out who you need to know and how to get to them Elicitation—a subtle way to get the answers you need without even asking a question Counterintelligence—how to determine if your organization is unwittingly leaking information Screening—CIA recruiters’ methods for finding and hiring the right people The methods developed by the CIA are all about getting what you want from other people. In a business context, these techniques apply to seeking a new job, a promotion, a big sale, an advantageous regulatory ruling, and countless other situations. As Carleson writes, “In a world where information has a price, it pays to be vigilant.” Her book will show you how.

The Man Who Mistook His Wife for a Hat Vintage

In his most extraordinary book, the bestselling author of Awakenings and "poet laureate of medicine" (The New York Times) recounts the case histories of patients inhabiting the compelling world of neurological disorders, from those who are no longer able to recognize common objects to those who gain extraordinary new skills. Featuring a new preface, Oliver Sacks’s The Man Who Mistook His Wife for a Hat tells the stories of individuals afflicted with perceptual and intellectual disorders: patients who have lost their memories and with them the greater part of their pasts; who are no longer able to recognize people and common objects; whose limbs seem alien to them; who lack some skills yet are gifted with uncanny artistic or mathematical talents. In Dr. Sacks’s splendid and sympathetic telling, his patients are deeply human and his tales are studies of struggles against incredible adversity. A great healer, Sacks never loses sight of medicine’s ultimate responsibility: “the suffering, afflicted, fighting human subject.”

Overcoming Addiction

Most of us are hooked on something, or have bad habits we can't quite kick or control. Being addicted is simply part of the human condition, but it also has deep emotional and psychological roots. Many of us struggle, often in silence, with our issues about alcohol, drugs, over-the-counter painkillers or food. Or it might be we overwork, staring at too many screens, spending too much money, or using sex and love as drugs. Overcoming Addiction looks at the underlying causes of both chemical and emotional addictions, and helps you to identify the real needs you are trying to fulfil underneath. It also helps you identify how you can help yourself break free from destructive habits, build self-esteem and even give up your addictions for good. In time, you can find new ways of relaxing, of being creative, having fun and relating, without your everyday addictions to lean on.

The Middle Way *Sterling Publishing Company*

Today, our global village is filled with strife, caused primarily by extremists of every kind, all unwilling to compromise. But there is a better way—a middle way—where we might discover common ground for peace, both personally and universally. Lou Marinoff, professor of philosophy and author of Plato, not Prozac, reveals the ABCs of finding that spiritually rich path: Aristotle, Buddha, and Confucius. Each of these wise men knew that extremism destroys happiness, health and harmony, and shared the supremely important notion that the main purpose of our existence is to lead a good life, here and now. In three sections, Marinoff examines the contemporary world and shows how the “Middle Way” provides solutions to our most pressing problems. Part One looks at civilizational dynamics that drive both cooperation and conflict across borders, and introduces each of the ABCs. The second segment focuses on some notorious extremes—including political polarization, and simmering religious, tribal, gender, cultural, and economic divides—and how the ABCs can reconcile them. And the third, final section enlightens us on how we all can apply the ABCs to the betterment of our own lives and humanity as a whole. A short list of recommended readings accompanies each chapter, along with illustrations, maps, and eye-opening charts.

Counselling Pupils in Schools *Routledge*

How can teachers support children with emotional or social difficulties? Counselling Pupils in Schools is a comprehensive guide to the effective use of counselling in schools. What to Do When I'm Gone *Bloomsbury Publishing USA*

A mother's advice to her daughter--a guide to daily living, both practical and sublime--with full-color illustrations throughout. One sleepless night while she was in her early twenties, illustrator/writer Hallie Bateman had a painful realization: her mom would die, and after she died she would be gone. The prospect was devastating, and also scary--how would she navigate the world without the person who gave her life? She thought about all the motherly advice she would miss--advice that could help her through the challenges to come, including the ordeal of losing a parent. The next day, Hallie asked her mother, writer Suzy Hopkins, to record step-by-step instructions for her to follow in the event of her mom's death. The list began: "Pour yourself a stiff glass of whiskey and make some fajitas" and continued from there, walking Hallie through the days, months, and years of life after loss, with motherly guidance and support, addressing issues great and small--from choosing a life partner to baking a quiche. The project became a way for mother and daughter to connect with humor, openness, and gratitude. It led to this book. Combining Suzy's wit and heartfelt advice with Hallie's quirky and colorful style, What to Do When I'm Gone is the illustrated instruction manual for getting through life without one's mom. It's also a poignant look at loss, love, and taking things one moment at a time. By turns whimsical, funny, touching, and above all pragmatic, it will leave readers laughing and teary-eyed. And it will spur conversations that enrich family members' understanding of one another.

Dibs *Mansion*

Dibs in Search of Self is a book by clinical psychologist and author Virginia Axline published in 1964.[1] The book chronicles a series of play therapy sessions over a period of one year with an emotionally crippled boy (Dibs) who comes from a wealthy and highly educated family. Despite signs that he is gifted, his mother, father, and most of his teachers perceive him as having an emotional or cognitive disorder. Dibs presents abnormal social behavior by continuously isolating himself, rarely speaking, and physically lashing out at those around him. When Axline first meets Dibs's parents, they describe her as their son's last hope. The book details the interactions between Dibs and Axline and utilizes actual session transcripts for dialogue.

How to Change Your Mind *Penguin*

“Pollan keeps you turning the pages . . . cleareyed and assured.” —New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, How to Change Your Mind is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's "mental travelogue" is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives.

Three Case Histories *Simon and Schuster*

These histories reveal not only the working of the unconscious in paranoid and neurotic cases, but also the agility of Freud's own mind and his method for treating the disorders. Notes upon a case of obessional neurosis (1909) Psychoanalytic notes upon an autobiographical account of a case of paranoia (dementia paranoides) (1911) From the history of an infantile neurosis (1918)
