Multimodal Signal Processing: Human Interactions in ...

Multimodal human-computer interaction refers to the "interaction with the virtual and physical environment through natural modes of communication". This implies that multimodal interaction enables a more free and natural communication, interfacing users with automated systems in both input and output.

Multimodal interaction - Wikipedia

Bringing together experts in multimodal signal processing, this book provides a detailed introduction to the area, with a focus on the analysis, recognition and interpretation of human communication. The technology described has powerful applications.

Multimodal Signal Processing edited by Steve Renals

The MSP laboratory is dedicated to advance technology in the area human-centered multimodal signal processing. We are

looking at theoretical problems with practical applications. Our goal is to develop methods, algorithms and models to recognize and synthesize human verbal and non-verbal communication behaviors to improve human machine interaction.

Home - Multimodal Signal Processing (MSP) Laboratory

In human-computer interaction systems, natural, affective and believable use of gestures would be a valuable key component in adopting and emphasizing human-centered aspects. However, natural and affective multimodal data, for studying computational models of gesture and speech, is limited.
