If M is a matroid with element set E , and S is a subset of E , the restriction of M to S , written $M|_S$, is the matroid on the set S whose independent sets are the independent sets of M that are contained in S . Its circuits are the circuits of M that are contained in S and its rank function is that of M restricted to subsets of S . In linear algebra, this corresponds to restricting to the subspace ...

Matroid - Wikipedia
The topics of this book The concept of a matroid has been known for more than five decades. Whitney (1935) introduced it as a common generalization of graphs and matrices. In the last two decades, it has become clear how important the concept is, for the following reasons: (1) Combinatorics (or discrete mathematics) was considered by many to be a collection of interesting, sometimes deep, but mostly unrelated ideas.
