Tower fans are vertical, therefore, the decision is usually made upon considering the fan height. For example, for the room of about 50 sq.ft a 29" model will be fine, a 100 sq.ft room will require a 40"-42" tower fan. You will need to consider a motor, of course, as it may be more or less powerful than regular but the height will tell you approximately what room you can cool down with a ...
