Ironically, the utilization of people as a security countermeasure
can be the most efficient and effective strategy or, depending on
the circumstances, the poorest. Because of the ongoing expense
of personnel (not only for salaries but also full benefit package,
supervision, and replacement), every effort should be exercised
to cure risks whenever possible by means other than utilizing
people.

All risk analysis methodologies enable system users to compare possible losses to their agency with the cost of countermeasures (a.k.a. safeguards or controls) designed to protect against those losses. To be useful, a risk analysis methodology should produce a quantitative statement of the impact of a risk or the effect of specific security problems.
