The Complete Yurt Handbook

The yurt or ger is a low-impact structure that causes no permanent damage to the land on which it is pitched. It is easy to erect and can be taken down in an hour. It is cool in summer and, with a stove, warm in winter. For centuries, people throughout central Asia have made yurts their homes. Robust and versatile, the yurt has evolved into the ultimate portable dwelling. Yurts are perfect for offices, summer houses,

meditation spaces, spare rooms, or just beautifully satisfying spaces to be in! Join the thousands of North Americans who are discovering the many virtues of the yurt. Part One of the book delves into the history of the yurt and the principles behind its construction, and explores modern life in a Mongolian ger and the culture and etiquette of ger living. Part Two gives fully illustrated and detailed instructions on how to make several of the most popular types of yurt, including the "weekend yurt." With a few common wood-working tools, even an absolute beginner could build the frame for this simple, elegant structure.

A Man Apart

Bill Coperthwaite's Radical Experiment in Living *Chelsea Green Publishing*

A story of friendship, encouragement, and the quest to design a better world A Man Apart is the story—part family

memoir and part biography—of Peter Forbes and Helen Whybrow's longtime friendship with Bill Coperthwaite (A Handmade Life), whose unusual life and fierce ideals helped them examine and understand their own. Coperthwaite inspired many by living close to nature and in opposition to contemporary society, and was often compared to Henry David Thoreau. Much like Helen and Scott Nearing, who were his friends and mentors, Coperthwaite led a 55-year-long "experiment in living" on a remote stretch of Maine coast. There he created a homestead of wooden, multistoried yurts, a form of architecture for which he was known around the world. Coperthwaite also embodied a philosophy that he called "democratic living," which was about empowering all

people to have agency over their lives in order to create a better community. The central question of Coperthwaite's life was, "How can I live according to what I believe?" In this intimate and honest account—framed by Coperthwaite's sudden death and brought alive through the month-long adventure of building with him what would turn out to be his last yurt—Forbes and Whybrow explore the timeless lessons of Coperthwaite's experiment in intentional living and self-reliance. They also reveal an important story about the power and complexities of mentorship: the opening of one's life to someone else to learn together, and carrying on in that person's physical absence. While mourning Coperthwaite's death and coming to understand the real meaning of his life and how it endures

through their own, Forbes and Whybrow craft a story that reveals why it's important to seek direct experience, to be drawn to beauty and simplicity, to create rather than critique, and to encourage others.

Decision Made *Electio Publishing*

Freedom and Hope always come at a cost . . . With the discovery of the New World, people who had been living under the oppression of governmental control of religion began to see hope. They saw a place of personal freedom to worship God in their own way. Decision Made is the story of John Kinsey and his friends seeking their religious freedom in the New World. But while hope dwells on the horizon, leaving behind their families, friends, and the lives they had known is

anything but simple. Their risky voyage across the Atlantic Ocean is only the beginning of their struggles. They quickly find their lives and quest for freedom entangled with a young nation fighting for its own freedom. Making the decision was only the beginning.

Practical Yurts

Building and Living in a Low Cost Alternative Structure *CreateSpace*

When Steven W. Hatch found himself in a housing crisis, pressed for time and money, he discovered that building a yurt was his best option. In *Practical Yurts*, Hatch thoroughly documents his project, beginning by explaining how a simple, round tent could fit the needs of a retired aerospace industry

professional. Beyond the practicalities of easy construction and low initial output and ongoing ownership costs, he was drawn to the “feeling” inside a yurt. Another deciding factor was learning that yurts are controlled by the building codes for alternative, membrane-covered frame structures, so he could save a big chunk of money and still meet his county's building code with a yurt, using radiant barrier insulation. Chock full of similarly useful information, photographs, and details about the planning, preparation, and building process, much of Hatch's book applies to any do-it-yourself, money-saving homebuilding project. But for Hatch, nothing could beat his yurt and the peacefulness of simple living it provides. An invaluable resource for people

looking to reduce their environmental footprint, lower their living costs, or build a great hunting cabin, Practical Yurts is presented in the personable tone of a friend who wants to share what he learned to help you avoid aggravation and make your building project a success.

The European Handbook of Central Asian Studies *BoD – Books on Demand*

This handbook is the first collection of comprehensive teaching materials for teachers and students of Central Asian Studies (CAS) with a strong pedagogic dimension. It presents 22 chapters, clustered around five themes, with contributions from more than 19 scholars, all leading experts in the field of CAS and Eurasian Studies. This

collection is not only a reference work for scholars branching out to different disciplines of CAS but also for scholars from other disciplines broadening their scope to CAS. It addresses post-colonial frameworks and also untangles topics from their ‘Soviet’ reference frame. It aims to de-exoticize the region and draws parallels to European or to historically European-occupied territories. In each chapter, the handbook provides a concise but nuanced overview of the topics covered, in which way these have been approached by the mainstream literature, and points out pitfalls, myths, and new insights, providing background knowledge about Central Asia to readers and intertwine this with an advanced level of insight to leave the readers

equipped with a strong foundation to approach more specialized sources either in classroom settings or by self-study. In addition, the book offers a comprehensive glossary, list of used abbreviations, overview of intended learning outcomes, and a smart index (distinguishing between names, locations, concepts, and events). A list of recorded lectures to be found on YouTube will accompany the handbook either as instruction materials for teachers or visual aids for students. Since the authors themselves recorded the lectures related to their own chapters, this provides the opportunity to engage in a more personalized way with the authors. This project is being developed in the framework of the EISCAS project (www.eiscas.eu), co-

funded by the Erasmus + Program of the European Union.

Building a Wood-Framed Panelized Yurt *Yurtyaks*

"I personally am really impressed with the quality and step by step instructions in this book." - Kent Griswold, publisher, The Tiny House Blog & Tiny House Magazine. Marvin Denmark, a carpenter and craftsman with 50+ years of experience, shares the procedures he used to build and assemble all the components of a 12-sided wood-panelized yurt. The structure is based on the original yurt design, employing a center ring and tension cable, but it is built using wood-framed panelized construction that includes radial rafters similar to a traditional yurt. A panelized

building system means that the components can be constructed off-site and then transported to the site for assembly. There are two editions of this book. This is the BLACK & WHITE EDITION: Detailed instructions, photographs and illustrations include the design, materials list and cut-list for a 16-foot diameter wood structure. There are also links to three videos that demonstrate construction of the components. This yurt was a 1st-place winner in the 2018 Tiny Homes Contest on Instructables.com.

allows the designer to fully exploit the software. Foundational chapters show how these technical skills fit into a deeper and more intuitive feeling for visualisation and representation, while featured case studies of leading designers, artists and architects illustrate the full range of different drawing options available. Hundreds of hand-drawn sketches and computer models have been specially created to demonstrate critical geometry and show how to build on basic forms and exploit principles of perspective to develop sketches into finished illustrations.
