John Money’s (1972) theory was that once a biological male or female is born, social labeling and differential treatment of boys and girls interact with biological factors to steer development. This theory was an attempt to integrate the influences of nature and nurture. Gender role preferences determined by a series of critical events:

Biological Theories of Gender | Simply Psychology

Sex-reassignment surgeries ostensibly “heteronormaliz[e]” people who are pressured to pursue this medical intervention for legal and religious reasons. While a repressive practice, Najmabadi also argues that this practice has paradoxically provided “ relatively safer semipublic gay and lesbian social space” in Iran.

Gender Studies: Foundations and Key Concepts | JSTOR Daily

Reducing health disparities and achieving equitable health care remains an important goal for the U.S. healthcare system. Cultural competence is widely seen as a foundational pillar for reducing disparities through culturally sensitive and unbiased quality care. Culturally competent care is defined as care that respects diversity in the patient population and cultural factors that can affect ...
