A new approach for robust replay spoof detection in ASV systems. Abstract:The objective of this paper is to extract robust features for detecting replay spoof attacks on text-independent speaker verification systems. In the case of replay attacks, prerecorded utterance of the target speaker is played to automatic speaker verification (ASV) system to gain unauthorized access.

We introduce a new method for robust principal component analysis (PCA). Classical PCA is based on the empirical covariance matrix of the data and hence is highly sensitive to outlying observations. Two robust approaches have been developed to date. The first approach is based on the eigenvectors of a robust scatter matrix such as the minimum covariance determinant or an S-estimator and is ...

A New Approach for Soft Synchronization of Microgrid Using Robust Control Theory. Abstract: Microgrid is the main part of future electrical power systems, called “smart grids”. In this context, the synchronization of a microgrid with utility or other microgrids will be a crucial and commonplace task during power system operation. Based on robust control principles, a new approach for synchronizing microgrids with utility was presented in this paper.
