Investment Appraisal And Financial Decisions

Investment appraisal techniques are payback period, internal rate of return, net present value, accounting rate of return, and profitability index. They are primarily meant to appraise the performance of a new project. The first question that comes to our mind before beginning any new project is "Whether it is

viable or profitable?

Investment Appraisal Techniques | Payback, ARR, NPV, IRR, PI

Investment appraisal is a way that a business will assess the attractiveness of possible investments or projects based on the findings of several different capital budgeting and financing techniques. For traders, it is a form of fundamental analysis as it can help identify long-term trends as well as a company's perceived profitability.

What is Investment Appraisal? | Definition and Techniques

... Decisions should thus be based on future net incremental cash flows, also known as "relevant cash flows" or "opportunity cash flows". There are three elements here: Cash flows. To evaluate a decision, actual cash flows should be considered. Noncash items such as depreciation and inter divisional charges should be ignored. Future costs and revenues. This means that past costs and revenues are only useful insofar as they provide a guide to the future.

Investment Appraisal and Financial Decisions by Steve ...

Investment Decisions. Investment decisions are the decisions taken in respect of the big capital expenditure projects. Such expenditures may involve investment in plant and machinery, vehicles, etc. A common characteristic of such expenditures is that they involve a stream of cash inflows in future and initial cash outflow or a series of outflows. Financial management is not only concerned with sourcing of funds, effective utilization of such funds is equally important to successfully ...
