Principles Of Engineering Economic Analysis

Engineering economics, previously known as engineering economy, is a subset of economics concerned with the use and "...application of economic principles" in the analysis of engineering decisions. As a discipline, it is

focused on the branch of economics known as microeconomics in that it studies the behavior of individuals and firms in making decisions regarding the allocation of limited resources. Thus, it focuses on the decision making process, its context and environment. It is pragmatic by

Engineering economics applies economic principles and calculations to engineering projects. Many basic economic principles may be applied in an engineering economic analysis, depending on their applicability. Time value of money is one such principle with wide applicability. This principle is used to calculate the future value of something given the present value, or the present value given the future value, at a given interest rate. For example, time value of money may be used to calculate ...
