The Female of the Species is incredibly thematic. It examines the lines between right and wrong, human nature and animal instinct, justice and corruption. It provides a thoughtful commentary on rape culture, the treatment of women, slut-shaming, and feminism.

The Female of the Species by Mindy McGinnis

The Female of the Species takes on issues highly relevant to contemporary girlhood, but it does so in an interesting, innovative, and ultimately very painful way. It's an excellent read, like McGinnis' other work, but it's not for the faint of heart — pick it up when you're feeling ready to delve into sex crime, the dark elements of the teenage psyche, and violence.

It is believed the human species split off from their oldest living ancestors, apes, around 6 million years ago to form H. sapiens. Modern humans then split from Neanderthals around 300,000 to 600,000 years ago. And 40,000 years ago, we began spreading from Africa to the rest of the globe. But the true origin of modern humans is bitterly ...
