Brain and nervous

system problems are common. These neurological disorders include multiple sclerosis, Alzheimer's disease, Parkinson's disease, epilepsy, and stroke, and can affect memory and...

Brain and Nervous System Disorders Center: Stroke ...

Neural tube defects
The neural tube, the embryonic structure that develops into the central nervous system, normally closes by the end of the third week of fetal growth; severe deficits result if it fails to close. Examples of neural tube defects include the absence of brain (anencephaly) and a cyst replacing the cerebellum.

Nervous system disease - Diseases

**and disorders |
Britannica**

Multiple sclerosis (MS) is a potentially disabling disease of the brain and spinal cord (central nervous system). In MS, the immune system attacks the protective sheath (myelin) that covers nerve fibers and causes communication problems between your brain and the rest of your body.

**Multiple sclerosis -
Symptoms and
causes - Mayo Clinic**

Acute brain syndrome is commonly caused by generalized metabolic diseases and intoxication with sedative drugs (including alcohol). The most common cause of dementia is Alzheimer disease. The disease is common in the elderly. The entire cerebral

cortex, particularly the frontal lobe, is affected.
