Nissan X-Trail 2.5 2007 | Auto images and Specification

In a multi-point injected engine, every cylinder has its own fuel injector, and the fuel injectors are usually installed in close proximity to the intake valve(s). Thus, the injectors inject the fuel through the open

intake valve into the cylinder, which must not be confused with direct injection.

Manifold injection - Wikipedia

Fuel Injection System
Fuel Injection History.
Older cars used to supply the engine with fuel using carburetors which are a mechanical device that used to mix air and fuel, and because of the mechanical injection systems have a low adjustment that suits the different working conditions of the engines such as various temperatures, working loads altitude, and ignition timing.
