Valve Guide Drivers | Goodson Tools & Supplies

Valve guide after fitting to cylinder head must be reamed (preferably honed) to standard size of 5/16 inch 0.3125 inch (7.93mm/ 7.94mm) this will remove any "peining " of valve guide during the fitting and ensure correct valve stem to valve guide clearance. Note valve guide sizing , A10 cylinder head guide hole is 0.5625 inch (14.29mm) so standard valve guide is 0.0015 inch larger (0.04mm) Check valve guide hole and if you need oversize valve guides , see our oversize guides listed.

Valve guide standard size colsibro material | SRM Classic ...

The job of the valve guide is to hold the valve stem perpendicular to the valve seat to ensure a smooth opening and closing operation and maintain good seat sealing. If the valve guide becomes worn the valve operation becomes compromised and poor valve seating, poor cylinder compression & oil leakage into the cylinder can occur.

The machining of the valve seat and valve guide is one of the primary cost drivers during the machining of cylinder heads. Exact angles at the sealing chamfers on the valve seat rings and close tolerances on the concentricity between valve seat and valve guide must be met. In addition to the high geometric requirements, the increasing requirements on the high-temperature stability of the valve seat rings mean that in general very hard and difficult to machine sintered materials are used.

You will need to check the valve guide in the cylinder head. Measuring this is achieved by placing a new valve into the guide, lifting it above the face of the head, and again in the case of the 300tdi engine is 8 mm to the top of the valve head, then the movement of the stem in the guide measured by a dial gauge.
