Mastering Chemistry Chapter 8 Answers | datacenterdynamics.com

answer. The first step in preparing for division is to replicate the cell's DNA in the S phase. In the G2 phase, the centrosome replicates. In early M phase, the centrosomes move away from each other toward the poles of the cell, in the process organizing the formation of the mitotic spindle. At the end of the M

phase when mitosis is complete, the cell divides (cytokinesis), forming two genetically identical daughter cells.
