Clipper(or CA-Clipper)is
a compiler 16 bits of
language xBase
environment for DOS .

It was created in 1984 with the purpose of being a compiler for Ashton-Tate dBase , a database manager very popular in his time. This is a derivation of the Clipper Summer and after being acquired by Computer Associates reached version 5.3b implemented by a graphical interface compatible with the MS-Windows 3.11, and for a subset of supported languages C and ...

This chapter works
with the first topic: the
languages used in
WordPress
programming. These

are HTML, CSS, PHP, and (optionally) JavaScript. If you have a basic knowledge of these languages—enough to understand the text and examples below—you should be good to go.

The Four Languages You Must Know to Understand WordPress ...

Clipper is an xBase compiler that implements a variant of the xBase computer programming language. It is used to create or extend software programs that originally operated primarily under MS-DOS. Although it is a powerful general-purpose programming language, it was primarily used to create

database/business programs. One major dBase feature not implemented in Clipper is the dot-prompt interactive command set, which was an important part of the original dBase implementation. Clipper, from Nantu

Clipper (programming language) - Wikipedia

The project is for troubleshooting a website programming for an online art project. It will be launched this Wednesday, but there are some browser compatibility issues. The amateur programmer built up the website using Firefox. But a particular page looks different and odd on Chrome currently.
