science. The fame of the 1887 Michelson-Morley aether-drift test on the relative motion of the earth and the luminiferous aether derives largely from the role it is popularly supposed to have played in the origins, and later in the justification, of Albert Einstein's first theory of relativity; its importance is its own.

The Ethereal Aether: A History of the Michelson-Morley ...

The modern concept of Aether was started by Rene Descartes, who suggested in 1644 that no empty space could exist and that space must therefore be filled with matter. Parts of this matter tend to move in straight trajectories, but because they lie close together, they cannot move freely, which, according to Descartes, implies that every movement is circular, so the Aether is filled with vortices.

Ether and Chloroform - HISTORY

According to ancient and medieval science, aether, also spelled æther, aither, or ether and also called quintessence, is the material that fills the region of the universe above the terrestrial sphere. The concept of aether was used in several theories to explain several natural phenomena, such as the traveling of light and gravity. In the late 19th century, physicists postulated that aether permeated all throughout space, providing a medium through which light could travel in a vacuum, but ...
