Where in early civilizations, the key purpose of clothing was to keep us warm and relatively dry, today, central heating warms our homes, reducing our dependence on clothes alone to help us to survive. Clothes have developed from a practical asset to a social marker: they affect the way we see ourselves. They help us to be seen in the light that we wish to be, and also exude our personalities and social status.

Fashion Psychology: What Your Choice in Clothes Say About You

Sociology of Fashion. Fashion that can be defined initially as the social systemic production, consumption and institutionalization of novelty is a cultural phenomenon that integrates culture, the individual and the economy. Fashion is both an idea and an ideal. Yet it finds expression materially and visually in forms coded by color, shape, texture and branding, and must be produced and circulated within cultural fields integrating local and global systems.
