Urban Road Design

A Guide to the Geometric Design of Major Urban Roads

"This major work provides guidelines for the geometric design of major urban roads and has been prepared by Austroads member agencies and industry experts to promote a common, standard approach to urban road design across Australia and New Zealand. Geometric road design guidelines are used as an aid to achieving consistent and operationally effective road designs. This guide represents the combined experience and international best practices of Austroads member agencies and industry experts in this area of geometric design. The result is an up-to-date coverage of Australian and New Zealand road design practice. Urban Road Design includes: definition of major urban roads; fundamental design considerations including performance requirements, traffic volumes and environmental considerations; design inputs such as speed and sight distance; geometric design guidelines for horizontal, vertical alignment, and cross section; other considerations such as intersections at grade, road safety and drainage and comprehensive glossary of terms. Urban Road Design is intended for use by general and local government practitioners working in road and traffic engineering and other related disciplines. Undergraduate and postgraduate students may also use it." - AustRoads website.
