trauma patients, including the detection of traumatic retroperitoneal injuries, many of which are clinically occult.

Traumatic Retroperitoneal Injuries: Review of ...

Traumatic injury to retroperitoneal structures often accompanies abdominal trauma. The retroperitoneum represents a potential anatomic space that is immediately posterior to the abdominal cavity. It contains organs that are

entirely within the retroperitoneum, as well as some organs that traverse from and back into the abdominal cavity.

UpToDate

Retroperitoneal bleeding refers to an accumulation of blood found in the retroperitoneal space. It can be traumatic or non-traumatic (spontaneous) with signs and symptoms of flank or abdominal pain, hematuria and shock.

Retroperitoneal bleeding - Wikipedia

Traumatic retroperitoneal injuries constitute a challenge for trauma surgeons. They usually occur in the context of a trauma patient with multiple associated injuries, in whom invasive

procedures have an important role in the diagnosis of these injuries.

Approach and Management of Traumatic Retroperitoneal ...

RETROPERITONEAL HEMATOMAS. In the case of severe trauma, the urologist may be consulted to evaluate a retroperitoneal hematoma found at the time of emergency laparotomy. Without a preoperative IVP or CT scan, the urologist has no information about the function of the kidneys or the extent of damage to the kidney within the hematoma.

Trauma | EM:RAP

The management of retroperitoneal trauma is often a challenge, even for an experienced trauma surgeon. The initial clinical assessment can be inaccurate. Investigations such as diagnostic peritoneal lavage, which is very sensitive for intraperitoneal trauma, are notoriously inaccurate in retroperitoneal injuries.

Retroperitoneal Trauma | JAMA Surgery | JAMA Network

We report the case of a 31-year-old male patient with underlying psychiatric illness and substance abuse who presented to the emergency department with a chief complaint of abdominal pain. CT scan of the abdomen revealed a large retroperitoneal mass wrapping around

the aorta and obstructing the left ureter causing hydronephrosis.
