Environmental Management of Wastewater Treatment Plants ...

Wastewater treatment, also called sewage treatment, the removal of impurities from wastewater, or sewage, before they reach aquifers or natural bodies of water such as rivers, lakes, estuaries, and oceans. Since pure water is not found in nature (i.e., outside chemical laboratories), any distinction between clean water and polluted water depends on the type and concentration of impurities found in the water as well as on its intended use.

wastewater treatment | History, Methods, Systems ...

The effluent treatment plant removes suspended solid matter (as sludge) and floating oils from the wastewater. The remaining emulsified oil is removed by chemical treatment using hydrochloric acid and aluminum sulfate. Lime is added to neutralize the wastewater prior to discharge to the municipal sewer.

ISO 14001 and wastewater treatment: Required processes

A set of indicators that incorporate environmental, societal, and economic sustainability were developed and used to investigate the sustainability of different wastewater treatment technologies, for plant capacities of < 5 million gallons per day (MGD) or 18.9 × 10³ cubic meters (m³ / day). The technologies evaluated were mechanical (i.e., activated sludge with secondary treatment), lagoon (facultative, anaerobic, and aerobic), and land treatment systems (e.g., slow rate irrigation ...
