Planning and

Scheduling in Manufacturing and Services ...

The two key problems in production scheduling are „priorities“ and „capacity“. Wight (1974) described scheduling as „establishing the timing for performing a task“ and observes that, in manufacturing firms, there are multiple types of scheduling, including the detailed scheduling of a shop order that shows when each operation must start and be completed [].

SCHEDULING in Production and Operations Management ...

Scheduling pertains to establishing both the timing and use of resources within an

organization. Under the operations function (both manufacturing and services), scheduling relates to use of equipment and facilities, the scheduling of human activities, and receipt of materials. While issues relating to facility location and plant and equipment acquisition are considered long-term and aggregate planning is considered intermediate term, operations scheduling is considered to be a short-term issue.

Operations Scheduling | Encyclopedia.com

Operations Scheduling a Scheduling is `the process of organizing, choosing and timing resource usage to carry out all the activities necessary to

produce the desired outputs at the desired times, while satisfying a large number of time and relationship constraints among the activities and the resources (Morton and Pentico, 1993). a Schedule ...
