Surface Areas and Volume - Definition and Formulas

This shape has a circular base and straight, parallel sides. This means that in order to find its surface area or volume, you only need the radius (r) and height (h). However, you must also factor in that there is both a top and a bottom, which is why the radius must be multiplied by two for the surface area. Surface Area = $2\pi r^2 + 2\pi rh$; Volume = $\pi r^2 h$
