In business and accounting, information technology controls are specific activities performed by persons or systems designed to ensure that business objectives are met. They are a subset of an enterprise's internal control. IT control objectives relate to the confidentiality, integrity, and availability of data and the overall management of the IT function of the business enterprise. IT controls are often described in two categories: IT general controls and IT application controls. ITGC include

Information technology controls - Wikipedia

Authorization – controls ensure access to the application system by approved business users only. Input controls – controls ensure data integrity feeds into the application system from upstream sources. Forensic controls – controls ensure scientifically and mathematically correct data, based on inputs and outputs.
