Case / Planting & Seeding Part Diagrams

Talking about 620/6200 press drills in hard ground takes me back about 35 years ago working for a neighbor. Back in the 1980s, the government was paying farmers to “idle” or “set aside” 10-20% of the farm ground by not planting it as a way to get rid of the grain surplus at the time.

Older IH, JD, Moline drills from the 50s, 60s, were typically about a bushel per foot of width. Later ones, like the IH 510, JD 8300, run about 3 bushels per foot. Sure is nice to run a few hours without refilling. My 10 foot Moline could make two rounds, half mile field, but not a third. 8300 was a big improvement.
