jQuery UI 1.10 The

jQuery UI 1.10: The User Interface Library for jQuery has been specially revised for Version 1.10 of jQuery UI. It is written to maximize your experience with the library by breaking down each component and walking you through examples that progressively build up your knowledge, taking you from beginner to advanced user in a series of easy-to-follow steps.

jQuery UI 1.10: The User Interface Library for jQuery

This site provides API documentation for jQuery UI 1.10. We encourage you to upgrade to the latest stable version of jQuery UI in order to receive the best support and take advantage of recent bug fixes and enhancements. Check out the upgrade guides and changelogs to find out more about upgrading. To get started, use the search at the top of the page, view the full listing of entries, or browse by category from the sidebar.

jQuery UI 1.10 Documentation

jQuery UI 1.10 introduces API redesigns for Dialog and Progressbar. You can read about the API redesign process on the jQuery UI Blog. Although the redesigns introduce breaking changes, 1.10 maintains full compatibility with the 1.9 API by default. This is accomplished by rebuilding the 1.9 API on top of the 1.10 API. The default behavior for all 1.10 releases will be to simultaneously use the 1.9 and 1.10 APIs, deferring to the 1.9 API if there is a conflict.

Selects elements which have data stored under the specified key. Also in: Methods.disableSelection() Disable selection of text content within the set of matched elements.

UI Core | jQuery UI 1.10 Documentation

The jQuery UI Resizable plugin makes selected elements resizable (meaning they have draggable resize handles). You can specify one or more handles as well as min and max width and

height.

Resizable Widget | jQuery UI 1.10 Documentation

The jQuery UI .position() method allows you to position an element relative to the window, document, another element, or the cursor/mouse, without worrying about offset parents.. Note: jQuery UI does not support positioning hidden elements. This is a standalone jQuery plugin and has no dependencies on other jQuery UI components.

.position() | jQuery UI 1.10 Documentation

A value of "left" or "right" will shake the element horizontally, and a value of "up" or "down" will shake the element vertically. The value specifies which direction the element should move along the axis for the first step of the effect.
