A body area network (BAN), also referred to as a wireless body area network (WBAN) or a body sensor network (BSN) or a medical body area network (MBAN), is a wireless network of wearable computing devices. BAN devices may be embedded inside the body as implants, may be surface-mounted on the body in a fixed position,

or may be accompanied devices which humans can carry in different positions, such as in clothes pockets, by hand, or in various bags.
