Development, Regional, Port-Industrial Complexes and. This article starts with a definition of ports as gateways with facilities for receiving and transferring passengers and cargo between water and land transport and emphasizes the role in port and industrial zones of a set of interrelated industrial activities.

Development, Regional, Port-Industrial Complexes and

Port and industrial complex is a powerful source of development, basis of investment potential of the coastal zone. In the context

of globalization, competitive advantages disappear on the basis of production factors; the development degree of all types of infrastructure comes to the foreground as an important factor of investment attractiveness (Kuznetsova, 2010).

Conception BSC for Investment Support of Port and ...

Ports are becoming increasingly regional in their dynamics, which represents a new development from their traditional local function, namely as industrial complexes. For instance, the port of Hong Kong owes its wealth to its natural site and its geographical position of a transit harbor for southern China.
