Decision Support Systems And Intelligent Systems 7th Edition

A Decision Support System (DSS), if used correctly, can help you make unbiased and quality decision, improving overall performance of your organization. A smart

application relies on both human and artificial intelligence.

Decision Support Systems - Introduction, Categorization ...

A decision support system is an information system that supports business or organizational decision-making activities. DSSs serve the management, operations and planning levels of an organization and help people make decisions about problems that may be rapidly changing and not easily specified in advance—i.e. unstructured and semi-structured decision problems. Decision support systems can be either fully computerized or human-powered, or a

combination of both.
