Who was Gregor Mendel? •Gregor Mendel is the “Father of Modern Genetics.” He was an Austrian monk who studied heredity in pea plants. His work was published in 1865. •He described “factors” that were passed between generations of plants. •We now know the factors are genes: chemical factors that determine characteristics.

Notes: Mendelian Genetics

Gregor Mendel was an Austrian monk born in 1822. He was in charge of the monastery gardens where he conducted investigations that changed the field of biology forever. What did scientists hypothesize about heredity before Mendel’s investigations? Before Mendel, many scientists thought that the hereditary material contributed by parents blended together in their offspring.
