Water Supply Engineering - Civil Engineering Notes

A water engineer is someone who deals with the provision of clean water, disposal of waste water and sewage, and the prevention of flood damage. Their job involves repairing, maintaining and building structures that control water resources (for example, sea defence walls, pumping stations and reservoirs). Global warming, ageing infrastructure, population growth, and higher quality living standards are just some of the challenges a water engineer has to address.

What does a water engineer do? - CareerExplorer

The New River is an artificial waterway in England, opened in 1613 to supply London with fresh drinking water taken from the River Lea and from Chadwell Springs and, originally, Amwell Springs, as well as other springs and wells along its course.. The river follows the land contours but certain parts have been straightened over the centuries. Although it was at one time threatened with closure ...
