Biosorption of Organic Dyes: Research Opportunities and ...
OVERVIEW. Azo dyes and pigments constitute by far the most important chemical class of commercial organic colorant. They account for around 60 70% of the dyes used in traditional textile applications (see Chapters 7 and 8) and they occupy a similarly prominent position in the range of classical organic pigments (see Chapter 9). Azo colorants, as the name implies, contain as their common structural feature the azo (N=N) linkage which is attached at either side to two sp 2 carbon atoms.
