Amazon.com: Customer reviews: High Integrity Software: The ...

The GB rail industry has employed high integrity software (HIS) for many years, primarily within signalling systems. There is now an increasing complexity to such systems, and also a more widespread application within rolling stock and electrification systems. It has been recognised that there is a weakness in the current capability of the rail industry as buyers to effectively specify, procure, and manage the lifecycle of such software compared to traditional electro-mechanical systems.
