The solutions are the two points where the quadratic equation crosses the x-axis. The same concept of quadratic solution applies to quadratic inequalities. Let's examine the graph of the quadratic inequality, $y > X^2 - 1$. Step 2. The solution of a quadratic inequality are all of the points within the area $y > X^2 - 1$ where $y = 0$. In other words, the solution of a quadratic equation holds the same meaning that you are accustomed to.
