Green Innovation in China by Joanna I Lewis | Waterstones

A new whitepaper, Technology and China's Green Development - Innovating An Environmentally Sustainable Future, outlines how companies in China and around the world use technology for sustainability in three different ways:

tactically for compliance and mitigating risk, opportunistically to improve efficiencies, and strategically to transform their business for responsible growth.

Technology And China's Green Development

Green innovation in China. This report describes a number of case studies of companies participating in the WWF Climate Savers programme and the changes this has led to in their operations in China. Companies include: Lafarge, Volvo, Nokia Siemens Networks, Fairmount Hotels, TetraPak, Sony.

Green innovation in China - Managing innovation

During the period of 2000–2015, China's

environmental-related technology innovation made great progress and was at the forefront of green technology growth; in particular, the areas of water and wastewater treatment, solar photovoltaic (PV) energy, lighting, improvements related to bulk or fine chemicals or pharmaceuticals, electric vehicles, and other technologies made great achievements.

Green technology innovation development in China in 1990 ...

This paper focuses on how green patenting influences a firm's subsequent performance. By investigating listed manufacturing firms in China for the 2000–2010 period, we find a positive and significant relationship between green patenting and firm performance.

Moreover, our research reveals that green growth is mainly driven by green utility-model patents and that this positive relationship only exists among state-owned enterprises (SOEs), which are more capable of leveraging green ...

Green innovation and firm performance: Evidence from ...

Green innovation in China. In fact, technological progress has become one of the most important driving factors for development in China. R&D investment has been increasing steadily from 461.6 billion RMB in 2008 to 1750 billion RMB in 2017 1, more than tripling in the last ten years.

Green innovation and firm performance: Evidence from ...

China has successfully embarked on a green mobility transition. It has created an innovation ecosystem with experienced investors, construction companies and innovative companies providing both globally leading and innovative hardware (e.g. high-speed trains, subways and e-busses) and operations. With the green Travel Action Plan issued in May ...

Green Public Transport Innovation in China - an ...

It briefly looks into how China is now succeeding at green innovation rather than just replicating technologies from elsewhere and manufacturing them inexpensively. China's emergence as a green energy leader comes at a time when energy is the topmost concern of

most national security agendas, and when climate change is being linked to extreme weather events and disasters.
