System dynamics - Wikipedia

The purpose of this study is to introduce system dynamics as a methodology to analyze intra-organizational innovation diffusion processes. Therefore, a purely algebraic model is replicated and analyzed in a system dynamics environment before it is extended by relaxing the restrictive assumption that intra-group diffusion and inter-group diffusion take place consecutively.

Using System Dynamics to Analyze Innovation Diffusion ...

Dynamics on the system-level are often represented by a set of differential equations and analyzed with the tools of dynamical

systems theory. Here the aim is to describe the fixed points/stable states of the system (stability analysis) and identify how system structure drives system behavior (e.g., bifurcation analysis).
