Key ecological questions are examined in the light of the latest experimental evidence. Throughout the text evolutionary theory is applied to an understanding of freshwater ecosystems, thereby filling a niche between traditional limnology and evolutionary ecology.

Limnoecology: The Ecology of Lakes and Streams | NHBS

...
"Limnoecology" is not a classical limnological or ecological textbook. The authors' goal was "to highlight the possibilities and limitations of ecological theories in the field of aquatics". Referring to Hutchinson's famous collection of essays (Hutchinson, 1965), Lampert and Sommer use aquatic organisms to analyse the evolutionary play as an outcome of ecological interactions.

integrates the fields of limnology and ecology by presenting empirical data drawn entirely from freshwater ecosystems in order to advance ecological theories (limnoecology). This second edition builds upon the strengths of the first with the structure of the book following the same hierarchical concept of ecology, from habitat properties, individuals, populations, coupled populations and communities to ecosystems.
