IHS CHEMICAL Process Economics Program (PEP): Wide Range ...

In view of the increasing commercial importance of methanol, Process Economics Program (PEP) of IHS Markit decided early this year to carry out a detailed technoeconomic study

of the major methanol manufacturing technologies based on the latest developments taking place in those technologies. This PEP report presents the results of that study.

Methanol - IHS Markit

This Forum will showcase a variety of innovations in process technology (catalyst and process engineering) for the refining, petrochemical, plastics manufacturing industries. It will feature crude-oil-to-chemicals (COTC), plastics chemical recycling, and the impact of carbon, all of which are enablers for social, environmental, and economic sustainability.

WPC 2020 Online Forum | IHS Markit

The production economics assessment in this report is based on a US Gulf Coast location. However, an iPEP Navigator module (an excel-based computer costing model developed by IHS) is attached with this report to allow a quick calculation of the process economics for three other major regions also—Germany, Japan, and China.
